

# Studiekoll – maps your study hours

---

## Product vision

---

*Studiekoll is a smart tool for Chalmers students who wants to gain control of their studies and achieve the planned number of hours. In Studiekoll the student is able to map the studied hours and visualize this in easily foreseeable charts distributed in weeks and study periods. Unlike other planning tools Studiekoll is specialized for Chalmers students and their specific study periods. This makes it easy for the student to compare the studied hours to the aimed goal of 50 hours per week.*

## Critical functionalities

---

- Possibility to map hours
- Possibility to arrange the hours in a chart
- Study goal – possibility to set a personal limit to the desired study hours for the student to achieve
